

High performance architectural panels **by Formica Group**

For simply great
cladding, that performs
all year round

+ F9687 Cinder Grey

VIVIX+® by Formica Group is a range of high performance architectural panels to create beautiful, long lasting & low maintenance building facades

Manufactured in the Nordic region, new VIVIX+ panels have been enhanced to improve performance and weatherability, to keep buildings looking better for longer.

Enhanced surface technology
- buildings will look better for longer

Highly UV & weather resistant,
performing all year round

Looking great, naturally

The closed surface of new VIVIX+® panels provides a number of outstanding performance benefits:

- UV protection for colour stability.
- Highly weather resistant panels, that perform all year round.
- Durability - highly scratch, stain and impact resistant.
- Panels do not rot and are highly resilient to cracking and chipping.
- VIVIX+ surface technology protects the panel, is easy to clean and allows graffiti or residual dirt to be removed.
- Low maintenance - no need for additional coatings or treatments, edge sealing or painting.

+ F9628 Natural White

A modern cladding solution, for new buildings and renovation projects

VIVIX+® panels are a highly usable cladding solution for both residential and commercial projects.

- Cost effective method to reclad older buildings, giving them a fresh appearance and greater appeal.
- A modern material, for new buildings - either to clad the full facade or to create design features, alongside complementary materials such as brick, render and glass.

+ F9650 Earthen

Durability – highly scratch, stain and impact resistant

Low maintenance, relatively lightweight and easy to install

+ F9656 Industrial Grey

Building protection

VIVIX+® panels act as a protective screen against the elements and as part of a ventilated facade system, can contribute to improved building performance.

- A cavity between the building wall and VIVIX+ panels enables a constant flow of air through the ventilated facade system.
- Moisture drains out or is evaporated by circulating air, keeping the building dry.
- VIVIX+ panels can help to protect the building from direct heat and cold.
- Additional insulation can be built into the system to improve a buildings thermal efficiency.
- VIVIX+ panels carry a 10-year warranty. If installed and maintained correctly, they will continue to look good for decades.

+ F9651 Terrain

Building 'color'

Inspired by the Nordic environment, the new VIVIX+® range of predominantly natural 'colors' have been selected to stay close to nature and to complement established architecture.

15 neutrals that range from white to black and include cool greys and earth tones are partnered with 4 'fun colors', when something bolder is needed.

EDF - Exterior grade, severe use, flame retardant grade.

Manufactured to European Standard EN 438:2016 part 6.

Colour system notations:

NCS® and RAL Classic notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. When exact colour information is required, or for cross-material matching (HPL to other materials), please always refer to an actual laminate sample in the specified finish.

Disclaimer

General

The information provided by Formica Group ("Formica") in this document is solely indicative. Formica is unable to warrant the accuracy and completeness of this information. No rights can be derived from the information provided; the use of the information is at the other party's risk and responsibility.

Colours used in Formica's communications (including but not limited to printed matter) and in samples of Formica's may differ from the colours of the Formica products to be supplied. Formica's products and samples are produced within the specified colour tolerances and the colours (of production batches) may differ, even if the same colour is used. The viewing angle also influences the colour perception. The specified colour stability and colour specifications relate only to the decorative surface of the Formica products, not to the core material and samples of the Formica products. Colour system notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. When exact colour information is required, please always refer to an actual laminate sample in the specified finish. Customers and third parties must have a professional adviser inform them about (the suitability of) the Formica products for all desired applications and about applicable laws and regulations. Formica is not liable (neither contractual nor non contractual) for any damage arising from or related to the use of this document, except if and to the extent that such damage is the result of willful misconduct or gross negligence on the part of Formica and/or its management.

General Conditions

All oral and written statements, offers, quotations, sales, supplies, deliveries and/or agreements and all related activities of Formica are governed by the Formica General Terms and Conditions of Sale in effect at the time of sale and contained in every order acknowledgement and are available upon request.

All general terms and conditions other than the conditions mentioned above are dismissed and do not apply, regardless of whether such terms and conditions are referred to on requests for offers, offer confirmations, stationery and/or other documents of the other party, even if Formica does not expressly object to such terms and conditions.

Cladding made convenient for you

Not only are VIVIX+® panels manufactured in the Nordics, our partner network provide full distribution across the region.

Panel sizes are designed for ease of handling and installation, while also providing optimised module design and processing efficiencies.

- VIVIX+ high pressure laminate panels are made from layers of wood based (natural) fibres and impregnated with thermosetting resins.
- Minimal dust and mess created during cutting and installation process.
- Panels can even be modified on site, using conventional wood working tools.
- Coordinated cutting service available through partner network.
- VIVIX+ panels are relatively lightweight.
