NORDIC FACADE SOLUTIONS

M21.8.1
Graphite Grey

YOUR LOCAL HPL CLADDING EXPERT

Nordic Facade Solutions offer a comprehensive service, providing you with high quality panels for ventilated facades, with a wide and varied range of decors and formats for great customisation possibilities.

Our team is a mix of experienced specialists from the Formica Group and Trespa, now working together to provide you with great service.
Our focus is solely on exterior products and our local presence means we are there when you need us:

- Production units in Kolho, Finland, and Weert, the Netherlands.
- Warehouse and distribution for the Nordic market from Klippan, Sweden, and Kolho, Finland.
- Marketing and sales offices in Klippan, Sweden and Helsinki, Finland.

EXTERIOR CLADDING PANELS

Discover a wide range of facade panels for innovative and highly functional ventilated facade systems, balconies and decorative solutions.

Our products are weather resistant and have high colour stability, sun and rain have no noticeable effect on the appearance of the panels. They are easy to clean and impact resistant.

Nordic Facade Solutions supply you with a wide range of decorative high-pressure compact laminate - a highly stable, weather resistant cladding panel.

MATERIALISING SUSTAINABILITY

Our sustainability policy is based on a deeply felt motivation to shift from 'being less bad' for the environment to being good and creating new value.

One of our main drivers of sustainability is durability. The longer the product lasts, the longer the period of time to spread the environmental impact associated with the production of raw materials and the manufacturing process. By needing fewer replacements, long-lasting products entail less use of resources, lower emissions of pollutants and a smaller amount of waste than short-lifespan goods.

The exceptional quality of all of our products is a result of this vision. They are, by definition, extremely durable and long-lasting materials.

MADE IN THE NORDICS, FOR THE NORDICS

Manufactured in the Nordic region with upgraded surface technology, VIVIX+® ensures buildings maintain their pristine appearance, enduring the test of time and weather.

- **Naturally Great-Looking:** VIVIX+ offers year-round weather resistance and UV protection, exceptional durability, and easy-to-clean surface technology.

- **Your Building Protection:** serving as a protective shield against the elements, this cladding enhances building performance through its use in a ventilated facade system, ensuring proper air circulation, moisture management, and thermal protection.

- **Convenient Solution:** VIVIX+ provides panels in sizes designed for easy handling, installation, and on-site modification, featuring minimal dust and mess during installation, and a relatively lightweight design.

- **Inspired by the Nordic Nature:** the new range draws inspiration from the Nordic environment, offering 15 neutral hues, and complemented by 4 vibrant "fun colours".

- **10-year Warranty:** if installed and maintained correctly, the panels will continue to look good for decades.

Formica Group invented high pressure laminate in 1913 and has been manufacturing facade panels since the 1970's. VIVIX+® panels are manufactured in Finland specifically for the Nordic market.

○ = **Made to order** (MTO). Contact customer service for information on the current delivery time. Minimum order quantity is 1 sheet.

● = **Made to Stock** (MTS) - «next truck» delivery from Klippan Warehouse, Sweden. Availability depend on current stock and may be subject to MTO. Contact customer service for the current stock balance when ordering. Minimum order quantity is 1 sheet.

EDF - Exterior grade, severe use, flame retardant grade. Manufactured to European Standard EN 438: 6.

All products are supplied single-sided (one decorative side) as standard. Brown core.
Double-sided (two decorative sides) is available for production against order unless otherwise stated in the programme.

ACCESSORIES

Item	Details	Availability
Wood screw	Stainless steel (A4), powder coated according to range. Suitable for 6.0 & 8.0 mm panel thickness. 500-pack, incl. bits.	●*
Metal screw	Stainless steel (A4), powder coated according to assortment. Suitable for 6-10 mm panel thickness. 500-pack, incl. bits.	●*
EPDM	Without glue. 25 x 0.105 m (roll). Black colour.	●
Corner trim, outer corner	Natural anodised. Suitable for 6.0 mm thickness. 3000 mm.	●
Corner trim, inner corner	Natural anodised. Suitable for 6.0 mm thickness. 3000 mm.	●
Joint profile	Natural anodised, two-part profile. Suitable for all panel thicknesses.	●
Joint profile, h-moulding	Natural anodised. Suitable for 6.0 mm thickness. 2500 mm	●
Drill bit	Special drill for fixing point 5.0 mm and sliding point 8.0 mm for wooden studs and 5.5 mm / 8.5 mm for metal. 10-pack per type.	●

* All items listed as MTS in the above stock and delivery programme have colour matched screws available in stock. Other items available to order. Note that wood screws for articles F9628, F9652, F9687 and F9688 can also be ordered as 100-packs. Contact your local representative for more information.

● = **Stocked item** - «next truck» delivery from Klippan Warehouse, Sweden. Availability depend on current stock. Contact customer service for the current stock balance and minimum quantities.

COMPELLING AESTHETICS AND LIMITLESS DESIGN POSSIBILITIES

Trespa® Meteon® offers a range of applications across diverse architectural projects. From commercial and residential buildings to educational institutions and healthcare facilities, it has proven its adaptability and endurance in both urban and natural settings.

The Trespa® Meteon® cladding collection offers a wide spectrum of designs, textures, and colours, allowing architects and designers to unleash their creative visions:

- The **Uni Colours** collection embodies timeless elegance with a range of solid hues that provide a versatile foundation for architectural expressions.

- **Wood Decors** bring the warmth and authenticity of natural wood grains to facades.

- The **Naturals** collection captures the rugged textures of nature, infusing facades with an organic feel that seamlessly integrates buildings with their surroundings.

- **Lumen** plays with light and shadow, offering reflective surfaces and vibrant colours that create dynamic facades with a contemporary flair.

- **Focus and Metallics** invite creative exploration through intricate patterns and striking metallic tones, enabling unique and eye-catching design statements.

HIGH-END QUALITY ENSURED

- **Durability and Weather Resistance:** Trespa® Meteon® is engineered to withstand the harshest weather conditions, including rain, wind, and UV radiation.

- **Low Maintenance:** With its non-porous surface, this cladding requires minimal maintenance. A simple cleaning regimen helps retain its original luster and appearance, saving both time and resources over the long term.

- **Sustainability:** Trespa® Meteon® is using efficient and state of the art manufacturing processes. The products are made out of fibers and resins with bio-based content.

- **Installation Ease:** Trespa® Meteon® enables an efficient installation process, allowing for precise execution of architectural visions.

- **Lifetime Extension:** in light of the environmental benefits arising from lifetime extension, the Trespa Second Life programme was launched, in which Trespa® Meteon® exterior panels are collected and given a second life after dismantling instead of being disposed of.

Made using natural fibers and resins, Trespa® Meteon® is a symbol of environmental responsibility.

Colour system notations:
NCS® and RAL Classic notations represent the closest match available in the particular system. They may or may not be exact and are provided for guidance only. When exact colour information is required, or for cross-material matching (HPL to other materials), please always refer to an actual laminate sample in the specified finish, available for order at nordicfacadesolutions.com.

THE COMPLETE SIDING SOLUTION

Pura® NFC by Trespa siding is as durable as it is charming. A natural-fibre core is encased within a sealed surface that locks dirt and weather out whilst locking colour and texture in. It offers the rustic texture of natural wood or the velvety matt texture of Lumen with engineered longevity. There will be no need for repainting or replacement pieces and cleaning is as simple as a little soap and water.

PURA® NFC allows for both horizontal and vertical installation, enabling architects and designers to craft innovative and captivating facades.

- **Complete Solution:** Pura® NFC by Trespa comes with a tailored collection of installation clips, colour-matched profiles and fasteners - everything needed to create an evenly hued facade.

- **No-fuss Installation:** the relatively low weight of the prefinished sidings makes them easy to slide into place and their durability means they can handle a rough build site.

- **Aesthetically Authentic:** a rich palette of decors replicates the textures and natural colour tones of wood, evoking a timeless appeal that complements various architectural styles.

- **Weather Resistance:** engineered to withstand harsh conditions, PURA® NFC remains pristine in rain, wind, sun, and temperature fluctuations.

- **Minimal Maintenance:** with a non-porous surface, PURA® NFC requires little upkeep, retaining its charm for years to come.

INSTALLATION

Pura® NFC by Trespa is engineered to be used in a ventilated facade solution that is easily installed. The combination of durability and ventilation helps the panel withstand challenging climates.
1. Pura® NFC siding

2. Pura® NFC clip

3. Colour-matched profile

4. EPDM

5. Subframe

6. Colour-matched fasteners

7. Load-bearing wall

8. Ventilation airflow
This sketch is intended as a general overview only.

The system includes an air cavity in front of the loadbearing wall, allowing an airflow that prevents heat and moisture accumulation.

Scan the QR code for a video on installation. Specifics on fixing solutions can be found via our website **nordicfacadesolutions.com**.
